

ELEMENTS AND PRINCIPLES OF DESIGN

Name: _____

Using your notes, complete the color wheel using the principles and elements of design. For each principle and element, use the color wheel to complete your example in that color. To do this, use red for your example of line, red-orange for your example of shape, orange for your example of form, and so on. You may reference your notes or images from the Internet, but all items on your project must be your own. Be sure to reference the color wheel, as this will be the representation of color as an element of design.
